

RESHAPE YOUR EXPECTATIONS

Tramec Plastics & Composites Brings together Precision Injection Molding Companies Across the Country to Provide You with Service & Capabilities that Go Beyond what You Thought Possible.

WIDE RANGE OF PRESS SIZES

With 20 to 1000+ TONS of clamping force at our disposal, we can take on your very small to really large molding needs without breaking a sweat.

MATERIAL EXPERTISE

Does your component need to be flexible? Or do you require durability & impact resistance? We'll apply our expert knowledge of plastics & composites to recommend materials for molding parts with just the right attributes for your application.

POST-MOLDING OPTIONS

Numerous capabilities including tampo & transfer printing, ultrasonic welding, component assembly, specialty packaging, and more!

AMERICAN MANUFACTURING

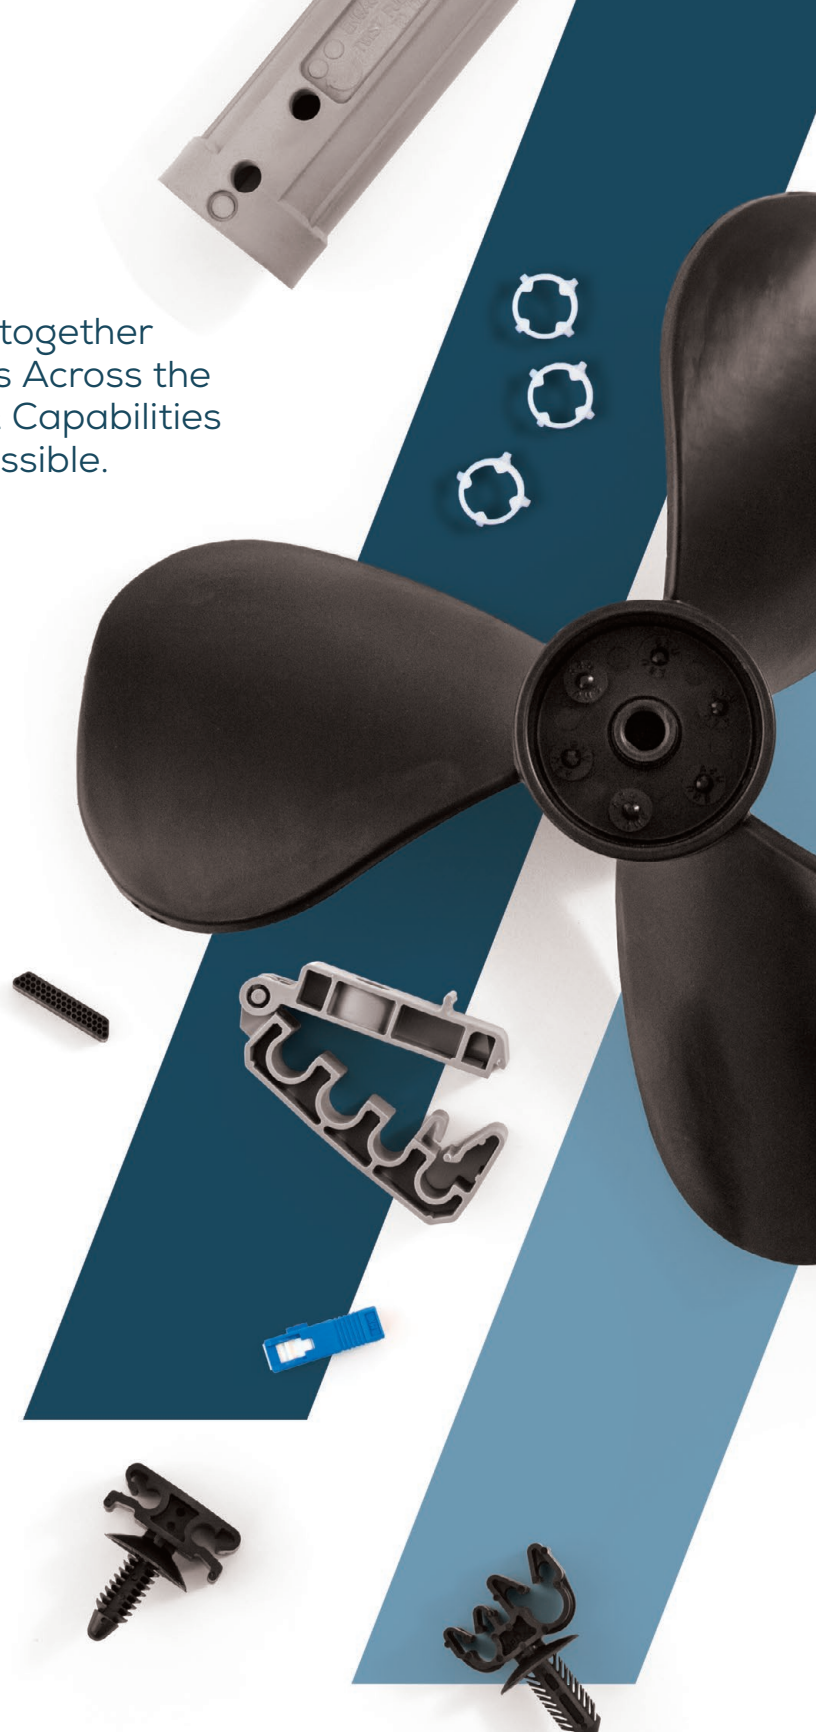

ISO 9001:2015 Certification paired with our U.S. manufacturing & distribution locations guarantee the high-quality and quick turn around you require.

PROJECT MANAGEMENT

Are you ready to get started with a new product design? We'll help coordinate tool production and sampling while keeping an eye on your budget and timeline needs throughout the production process.

TAKE-OVER TOOLING & MAINTENANCE

Our take-over tooling services allow us to provide you with parts fast. Plus, with in-house abilities to maintain & upgrade your tooling, we often produce better parts than you had before!
